

PUEBLO REGIONAL BUILDING DEPARTMENT

316 West 15th St. Pueblo, CO 81003
719 543-0002 Fax: 719 543-0062
e-mail: permits@prbd.com

The Pueblo Regional Building Department is a quasi-governmental agency that is the enforcing authority of adopted major and minor regulatory codes for Pueblo County and is governed by a commission and boards that are made up of civic minded individuals who are appointed or elected by various government entities and building trade representatives.

Mission Statement

"The Pueblo Regional Building Department is dedicated to promoting and preserving building safety through professional and courteous service. The purpose of the Department is to educate the public, enforce minimum building code standards through teamwork and personal pride, and to enhance the relationship with the public and building community."

Compendium

Pueblo County is located in Southern Colorado along the Front Range of the Rocky Mountains; Colorado's Major growth corridor. The City of Pueblo lies 110 miles south of Denver at the crossroads of two major highways; Interstate 25 which runs north and south from Montana through New Mexico, and US Highway 50 which runs east and west from coast to coast. Colorado Springs, the state's second largest city and hub of the Pikes Peak region, is located 40 miles north of the City of Pueblo. The New Mexico cities of Santa Fe and Albuquerque are located 250 and 320 miles southwest of Pueblo, respectively.

Pueblo has a very mild climate with an average of 300 days of sunshine each year. Summer temperatures average in the 80s and 90s, with cool evenings averaging in the 60s. Winter brings occasional snow showers, however, with average winter daytime temperatures in the 40s and 50s, the snow melts quickly. The average annual precipitation in Pueblo is 11.8 inches, which is reflective of the area's semiarid climate. The Pueblo area also enjoys excellent air quality.

Pueblo's building cost has always been among the lowest in America, largely because the weather allows construction 51 weeks a year.

Jurisdiction

All of Pueblo County falls within the jurisdiction of the Pueblo Regional Building Department. This includes the City of Pueblo, Pueblo West, Beulah, Colorado City and all other communities that are located in Pueblo County. The corporate limits of the town of Rye, State owned and Federal owned property are excepted.

Business Hours

The Pueblo Regional Building Department is open for business from 7:30AM to 4:30PM Monday through Friday, except certain holidays. During non-business hours you may leave a recorded message, request inspections, etc. Office hours for Inspectors are from 7:30AM to 8:30AM Monday through Friday.

Dan Daniels, Chief Plumbing Inspector
Dan Jones, Senior Plumbing Inspector
Doug Berg
Derrick McCabe

PLANS EXAMINERS

Butch Wodishek, Chief Plans Examiner
Carlos Atilano, Senior Plans Examiner

Regulatory Codes

The following major regulatory codes have been adopted and are enforced throughout the entire jurisdiction of the Pueblo Regional Building Department.

<i>INTERNATIONAL BUILDING CODE</i>	2003 EDITION
<i>INTERNATIONAL RESIDENTIAL CODE</i>	2003 EDITION
<i>INTERNATIONAL ENERGY CONSERVATION CODE</i>	2003 EDITION
<i>NATIONAL ELECTRIC CODE</i>	2005 EDITION
<i>UNIFORM MECHANICAL CODE</i>	2003 EDITION
<i>UNIFORM PLUMBING CODE</i>	2003 EDITION

In addition to the above, other minor codes such as *Uniform Housing Code* and *Code for Abatement of Dangerous Buildings* are enforced by the Pueblo Regional Building Department. Pueblo Regional Building Department employees will assist you in the determination of which code(s) apply to your project(s).

Licensing

A proficiency examination is required for each type and class license applied for. A licensing packet that explains licensing requirements and includes an application form and other information that will assist in obtaining a contractor's license is available from the Pueblo Regional Building Department upon request. Applications and other forms can also be downloaded from our website.

The Pueblo Code of Ordinances establishes criteria for the evaluation and investigation of the license applicant - "The appropriate Board shall examine

the applicant and investigate or cause to be investigated the character, training, experience and financial responsibility of the applicant for the license and the organization for which such applicant is employed if such organization is responsible for the work performed by the applicant. No license shall be issued if lack of experience, inadequate training, lack of financial responsibility or such other pertinent factors considered by the Board would in the opinion of the appropriate Board endanger the public health, safety, or welfare, or shows that the applicant would not be qualified or capable to engage in the construction business or to perform the construction work for which he seeks a license.”

License Required

Except as specifically otherwise provided in the Pueblo Code of Ordinances, every person performing construction work or engaging in the construction business must have received the appropriate license, registration or certificate of competency.

Although painting, wallpapering and other “cosmetic” work *may* not require a license from the Pueblo Regional Building Department, a separate license to do business in Pueblo County may be required by another entity.

An individual who is involved with any building/construction trade industry related project has the responsibility to check with the Pueblo Regional Building Department for a discernment of whether or not a license may be required.

Exemption from the licensing requirements of this code shall not be deemed to grant authorization for work to be done in violation of the provisions of adopted codes or other laws or ordinances of this jurisdiction.

A contractor’s license will be issued in two to six weeks following the initial application, provided all requirements have been met.

License Types

BUILDING

A - UNLIMITED

Hospitals, Schools, Etc.

B - COMMERCIAL AND RESIDENTIAL

C - RESIDENTIAL ONLY

D - SPECIALTY / SINGLE TRADE

Framing, Concrete, Drywall, Etc.

OTHER

ELECTRICAL

MECHANICAL

PLUMBING

There are also a number of specialty and single trade licenses that are included within the Mechanical and Plumbing categories. The Pueblo Regional Building Department will assist you in determining which license you must obtain in order to practice your particular skill or trade.

License and Examination Fees

The fee for obtaining a contractor's license will range from \$75 to \$175 and the examination fee from \$25 to \$50 depending upon the license type and class.

Unlicensed Contractors

BEWARE OF UNLICENSED CONTRACTORS

If you are planning a home improvement project like a deck, a new bathroom, or a garage, you will probably need to hire a building contractor.

There is no shortage of building contractor horror stories. Almost everyone has heard tales of damage, scams, shoddy workmanship and builders who disappear in the middle of a project. In fact, except for auto repair shops and car dealerships, no other industry has generated as many complaints, according to the Council of Better Business Bureaus.

It would seem that finding a reliable and qualified contractor is not an easy task. You can put the odds on your side by making sure you hire only licensed contractors.

For the rest of the story click [here](#).

Permits

Protection of people and property are the primary reasons a permit is required. The Pueblo Regional Building Department will check to make certain construction and installations are safe and properly completed for the protection of the contractors involved, the owner, the occupants, adjacent property and future buyers of the property.

It is important that necessary permits are obtained prior to commencement of a project to avoid additional permit costs.

The following explains the type of work being done that constitutes the necessity for obtaining one or more permits. Also included is information and conditions for obtaining owner generated permits.

Building Permits Required

Except as specified in the afore mentioned building codes, "No building or structure regulated by this code shall be erected, constructed, enlarged, al-

tered, repaired, moved, improved, removed, converted or demolished unless a separate permit for each building or structure has first been obtained from the building official. (Pueblo Regional Building Department).”

An individual who is involved with any building or construction project has the responsibility to check with the Pueblo Regional Building Department to for a discernment of whether or not a permit is required.

Exemption from the permit requirements of this code shall not be deemed to grant authorization for work to be done in violation of the provisions of adopted codes or other laws or ordinances of this jurisdiction.

Unless otherwise exempted, separate mechanical, electrical and/or plumbing permit(s) may be required.

Electric Permits Required

Except as exempted in afore mentioned building codes, “No electrical system regulated by said codes shall be installed, altered, repaired or remodeled unless a separate electrical permit for each building or structure has first been obtained from the building official (Pueblo Regional Building Department).”

An individual who is involved with any building or construction project has the responsibility to check with the Pueblo Regional Building Department for a discernment of whether or not a permit is required.

Exemption from the permit requirements of this code shall not be deemed to grant authorization for work to be done in violation of the provisions of adopted codes or other laws or ordinances of this jurisdiction.

Unless otherwise exempted, separate building, mechanical, and/or plumbing permit(s) may be required.

Mechanical Permits Required

Except as exempted in the afore mentioned codes, “No mechanical system regulated by said codes shall be installed, altered, repaired, replaced or removed unless a separate mechanical permit for each separate building or structure has first been obtained from the Pueblo Regional Building Department.

An individual who is involved with any building or construction project has the responsibility to check with the Pueblo Regional Building Department for a discernment of whether or not a permit is required.

Exemption from the permit requirements of this code shall not be deemed to grant authorization for work to be done in violation of the provisions of adopted codes or other laws or ordinances of this jurisdiction.

Unless otherwise exempted, separate building, electrical, and/or plumbing permit(s) may be required.

Plumbing Permits Required

Except as exempted in the afore mentioned codes, “It shall be unlawful for any person to install, remove, alter, repair or replace or cause to be installed, removed, altered, repaired or replaced any plumbing, gas, or drainage piping work or any fixture or water heating or treating equipment in a building or premises without first obtaining a permit to do such work from the Pueblo Regional Building Department. A separate permit shall be obtained for each building or structure.”

An individual who is involved with any building or construction project has the responsibility to check with the Pueblo Regional Building Department for a discernment of whether or not a permit is required.

Exemption from the permit requirements of this code shall not be deemed to grant authorization for work to be done in violation of the provisions of adopted codes or other laws or ordinances of this jurisdiction.

Unless otherwise exempted, separate building, electrical and/or mechanical permit(s) may be required

Owner Generated Permits

An individual who intends to build a *single family* residence and who will occupy said *single family* residence may apply for an owner generated permit. An owner build residence is not exempt from any permit requirements.

Permit Fees

Permit fees are determined by using information contained in the *Building Valuation Data* table and the *Building Permit Fee Schedule*. These valuation and fee tables may not be all-inclusive and are subject to change. A current *Building Valuation Data Table* and *Building Permit Fee Schedule* is available from the Pueblo Regional Building Department upon request.

Permit Fee Calculation

Suppose you are building a 1200 sq. ft. home that will have an 800 sq. ft basement that will remain unfinished and an attached garage that is 560 sq. ft. Referring to the Building Valuation Data Table you will find the finished living area is valued at \$73.93 per sq. ft. The unfinished basement and the attached garage are valued at \$12.50 per sq. ft. The Total Valuation is determined as illustrated below. Please note that this is merely a sample; you should refer to the actual permit fee table for current info.

Living area	1200 sq. ft. X \$73.93 = \$88,716
Unfinished basement area	800 sq. ft. X \$12.50 = \$10,000
Attached garage	560 sq. ft. X \$22.00 = <u>\$12,320</u>

Total Valuation \$111,036

Now refer to the Permit Fee Schedule and note that the valuation of your project (\$111,036) is between \$100,001 and \$500,000 so your fee will be \$654.50 for the first \$100,000. To calculate the rest of your fee subtract the first \$100,000 from the Total Valuation:

$$\$111,036 - \$100,000 = \$11,036$$

then multiply each additional \$1000 and "fraction thereof" (11+1) by \$3.50.

$$12 \times \$3.50 = \$42.00$$

First \$100,000	\$654.50
Each additional \$1000 or fraction thereof	\$ 42.00
Total Permit Fee	\$696.50

Plan review fees are in addition to Permit Fees

Building Valuation Data

NEW RESIDENCES AND ADDITIONS THERETO

All finished living areas above grade \$73.93 / sq.ft.

Garden level and basement level, finished \$32.00 / sq.ft.

Basement, unfinished \$12.50 / sq.ft.

Finish existing basement \$19.50 / sq.ft.

GARAGES AND ANCILLARY STRUCTURES

Detached garage \$24.00 / sq.ft.

Attached garage \$22.00 / sq.ft.

Carports (open on two or more sides) \$15.00 / sq.ft.

Open patios or porches with roof \$11.00 / sq.ft.

Enclosed patio \$25.00 / sq.ft.

Deck \$10.00 / sq.ft.

Deck with roof \$20.00 / sq.ft.

Storage only \$ 9.00 / sq.ft.

COMMERCIAL BUILDINGS AND ALL OTHER WORK

Refer to Permit Fee Schedule. Valuation is based upon contract price to include all materials, labor, overhead and profit.

Permit Fee Schedule

<u>VALUATION</u>	<u>PERMIT FEE</u>
\$1 to \$500	\$30.00
\$501 to \$2,000	\$30.00 for the first \$500.00 plus \$2.00 for each additional \$100.00 or fraction thereof.
\$2,001 to \$25,000	\$60.00 for the first \$2,000.00 plus \$9.00 for each additional \$1,000.00 or fraction thereof.
\$25,001 to \$50,000	\$267.00 for the first \$25,000.00 plus \$6.50 for each additional \$1,000.00 or fraction thereof.
\$50,001 to \$100,000	\$429.50 for the first \$50,000.00 plus \$4.50 for each additional \$1,000.00 or fraction thereof.
\$100,001 to \$500,000	\$654.5 for the first \$100,000.00 plus \$3.50 for each additional \$1,000.00 or fraction thereof.
\$500,001 to \$1,000,000	\$2,054.50 for the first \$500,000.00 plus \$3.00 for each additional \$1,000.00 or fraction thereof.
\$1,000,001 and up	\$3,554.50 for the first \$1,000,000.00 plus \$2.00 for each additional \$1,000.00 or fraction thereof.

The permit fee covers all work done on the project including electrical, mechanical and plumbing.

The valuation to include the cost of all materials and labor performed at the job site and includes overhead and profit.

If any materials are provided by the owner, the owner must provide the cost of the materials to the contractor to be included in the valuation.

Routing

REQUIRED PROJECT APPROVALS

Prior to the Pueblo Regional Building Department issuing a permit, it is required that approval or validation is obtained from other concerned entities such as Zoning, Planning, Utilities, etc. This process of approval and validation is called "routing". The Pueblo Regional Building Department will provide a routing sheet that will indicate which entities must give approval or validate the project for which you are seeking a permit. A map showing the location and directions to each of these other entities will be provided upon your request. Electronic routing can also be completed through our web site.

Plan Review

A plan review is required for new and remodeling of commercial buildings and new residential buildings. The plan review by the Pueblo Regional Building Department and approval by other entities allows us to be certain that your project is within compliance of all major and minor codes and that regulations concerning land usage and density, access to public utilities and public services, required set backs, off street parking, etc. have been met; all of which help to conserve property values and to promote the general health and welfare of the community as a whole.

Plan review priority is based upon the order the plans have been accepted for review. Residential plan review is usually completed within two or three working days after a plan is accepted for review. A Commercial plan review will require two or three weeks from the time the plans are accepted for review.

The plans examiner may request a “pre-review” conference for any structure or business that may be considered to be a group H occupancy.

Following the plan review, the response from the Pueblo Regional Building Department will be either approved or approved after certain conditions have been met.

Since the Pueblo Regional Building Department does not advise when a plan review is completed, the individual who has submitted plans for review has the responsibility to check plan status and review response. A plan review is valid for 180 days following review completion.

A checklist of requirements for submitting plans for review follows. Feel free to call the Pueblo Regional Building Department if you have any questions concerning what must be included to insure your plans will be accepted for review. Failure to include any of the items on or with your plans when they are submitted may result in the Pueblo Regional Building Department rejecting your plans which could cause a delay in starting date of your project.

Commercial Plan Review Check List

(Includes but may not be limited to)

- Job site name.
- Job address and legal description
- Two sets of plans, each sheet/page “wet-stamped” and signed by a Colorado licensed architect or engineer.
- Code study to include:
 - Occupancy classification
 - Type of construction
 - Occupant loads (including employees)
 - Location on property
 - Floor areas

- Height and number of stories.
- Engineered foundation (if required)
- Floor plans and any other detail necessary to show all work being performed.
- Electrical plan to include:
 - One line diagram showing service run
 - Panel schedule
 - Lighting, outlets and equipment
- Mechanical plan to include:
 - Size and location of supply and return ducts
 - Size and location of gas lines
 - Location of mechanical equipment
 - Combustion air source
- Plumbing plan to include:
 - Size and location of water and sewer service lines
 - Location of drinking water
 - Fixture units
 - Sand traps and grease traps (if required)
 - Location of back-flow prevention devices
- ADA requirements
- Energy Code Study
- Structural cross-section
- Site plan

NOTE: *Health Department approval will be required before a permit is issued if your plans include food service, septic tank, commercial kitchen or commercial swimming pool.*

Residential Plan Review Check List

(Includes but may not be limited to):

- Two sets of floor plans:
 - Floor Plan w/ dimensions
 - All 4 Elevations
 - Typical Wall Cross-section
- Engineered foundation, “wet stamped” and signed, showing legal description and address.
- Soils Classification Report
- Energy Code Study
- Plot plan showing legal description and address

Plan Review Fees

Commercial plan review fee is in addition to the commercial permit fee and is equal to one half of the commercial permit fee. Commercial Plan Review Fee is due and must be paid at the time plans are submitted for review.

Residential plan review fee is in addition to the residential permit fee and is equal to 10% of the residential permit fee.

Inspections

The permit holder has the responsibility to request an inspection of work that has been completed. Usually a request for an inspection that has been made by 8:30 AM will be scheduled by the inspector for the same day the request is made. Requests made after 8:30 AM will be scheduled for the next business day.

Prior to making an inspection, the inspector will require that the job address be clearly posted, the permit/inspection record card visible from the street and accessible, and an approved set of plans “on site”.

Special inspections are conducted by appointment following application and payment of fee and usually require 24 hours notice. In cases where a special inspection may involve another entity such as the Fire Department or Health Department, more than 24 hours notice may be required.

Certificate of Occupancy

A certificate to occupy will be issued after all required inspections have been completed and all work has been approved.

In some instances, a temporary certificate to occupy may be issued. An additional fee will be assessed and a list of items that have not yet been completed will be maintained on file with the Pueblo Regional Building Department. All listed items must be completed within 90 days or less. Failure to complete within the allotted time could result in the occupants being evicted from the property and the utilities disconnected.

Frequently Asked Questions

IF I NEED EXPERIENCE TO OBTAIN A CONTRACTOR'S LICENSE, HOW DO I GET THE EXPERIENCE I NEED WITHOUT HAVING A LICENSE?

You can acquire experience by working for someone else that is licensed. Your former employer and his former customers can fill out a work experience form for you. You are looking for someone that can attest to the work you have done for them. The more experience information you can provide to the board, the better it is for you.

HOW CAN I PROVE MY WORK EXPERIENCE IF I HAVE NEVER WORKED IN THIS AREA AND I DON'T KNOW ANYONE HERE THAT CAN TESTIFY TO MY WORK EXPERIENCE?

Work experience you have acquired is not restricted to work you have done in this area. We will accept your work experience from anywhere in the world as long as it is properly documented.

I HAVEN'T WORKED A CONSTRUCTION TRADE JOB FOR 10 OR 15 YEARS. DOES THE WORK THAT I HAVE DONE YEARS AGO COUNT TOWARDS MY EXPERIENCE?

Work experience that you have gained is to your credit no matter how long ago it was. Now is the time to brag about your experience and accomplishments.

WHY IS A CREDIT REPORT REQUIRED?

A credit report is required by ordinance. This is for your protection as well as those you might do work for. You would not want to work as a sub-contractor for someone that did not pay you or does not pay the vendors that supply the materials.

WILL THE PUEBLO REGIONAL BUILDING DEPARTMENT ACCEPT MY INSURANCE COMPANY'S PROOF OF INSURANCE FORMS?

The first time you show proof of insurance, your insurance agent is required to fill out and sign the form that is supplied by the Pueblo Regional Building Department. Following this, when it is necessary for you to show proof of insurance, the Pueblo Regional Building Department will accept your insurance company's form provided the cancellation clause is altered by striking the words, "endeavor to" and "but failure to mail such notice shall impose no obligation or liability of any kind upon the company, its agents or representatives".

IF I AM THE OWNER OR PARTNER OF A COMPANY, DO I NEED WORKER'S COMPENSATION INSURANCE?

If you are sole owner and have no employees, you can sign a worker's compensation waiver. If you are a partnership, you are required to have partnership papers drawn up by an attorney, the partnership registered with the state of Colorado and all partners must sign a worker's compensation waiver. If you hire your employees from a temporary employment agency, you will be required to provide a certificate of worker's compensation that shows coverage for those employees from the employment agency.

Much information is derived from various sources and is subject to change. The Pueblo Regional Building Department makes no representation as to the accuracy of the information that follows

Fire Protection Districts

Emergency – Call 911

Fire protection within Pueblo County is provided by a number of individual, separate departments, which may be paid (P), volunteer (V) or a combination of paid and volunteer personnel. There is a mutual aid agreement between most departments in the event additional equipment and personnel is required. A property owner is advised to check with a fire department to verify fire service to their property.

Please feel free to contact any of the individuals or departments that are listed below if you have any questions regarding fire protection within Pueblo County.
