The values below are the required insulation and fenestration values per the 2015 building code. If you do not use ResCheck to calculate insulation values, the values below are the minimum requirements:

Wall (frame): **R-20 or R-13 +5 (cavity + continuous)**

Wall (mass wall): **R-13 or R-17 (if more than half the insulation is interior to mass wall)**

Ceiling: **R-49**

Floor: **R-30 or fill framing cavity (R-19 min)**

Basement: **R-10/13 (until 3/1/17 then will be R-15/19)**

Slab: **R-10, 2ft deep. R-15 for heated Slabs**

Crawl Space: **R-10/13 (until 3/1/17 then will be R-15/19)**

Windows: **0.32 max U-Factor**

For additional information, please refer to the 2015 International Energy Conservation Code Book Table R402.1.2, climate zone 5.
